Category: Community Growth, Developer Adoption & Global Expansion

This proposal requests DAO approval to launch the first pilot phase of the Redbelly Global Campus Tour Framework, a standardized, scalable system that any region can use to run high-quality developer and contributor onboarding events with unified messaging, KPIs, cost models, and educational materials.

The first implementation is simply the controlled pilot, chosen for efficiency, speed, and clarity.

Nigeria was selected as the pilot location for the Redbelly Global Campus Tour due to its status as Africa's largest digital economy, its rapidly growing Web3 developer community, and its high concentration of active youth and university students. The country provides an ideal testing ground to validate engagement models, operational workflows, and onboarding strategies at scale before global rollout.

The goal is global: the outputs of this pilot become the official Campus Tour Playbook that all Pod Leaders and Genesis Leaders worldwide can replicate in their own countries and regions with less friction and predictable

Redbelly Network

Countries in view. India, Singapore, United States, United Kingdom, United Arab Emirates (UAE), Australia, Germany, South Korea, Brazil and many more!

What the DAO Gains (Global Impact)

A complete, professional Campus Tour Playbook

Includes: scripts, event structure, cost templates, media workflow, KPI tracking, reporting formats, onboarding funnel, usable by any country.

Unified global messaging

The same educational narrative, developed with the Chief Science Officer, becomes the global standard for universities, meetups, hackathons, and online learning.

A frictionless global expansion model

After the pilot phase, Pod Leaders and Genesis Leaders everywhere in the world can duplicate the model without reinventing logistics or strategy.

Measurable developer pipeline growth

The framework supports long-term contributors, not just event attendees.

Pilot Deliverables (Pilot Phase)

This initial phase produces the tested model for global rollout:

- 4 universities educated.
- ~2,500+ students onboarded.
- 2–3 tech club/developer community partnerships.
- High-quality content for DAO visibility.

Redbelly Network

This becomes the blueprint for every region.

Budget — \$7,251 (USDT + RBNT)

A streamlined, milestone-based budget split into:

- Travel & logistics.
- Venues & equipment.
- Media capture.
- Student activation (Merchandise).
- Global playbook development (RBNT).

The structure ensures transparency, oversight, and responsible spending.

Oversight & Verification

Milestone-by-milestone approval by:

High Council Members

Pod Leaders

Genesis Leaders

OVERVIEW VOTES 27

sake.

Each event, expense, and output is verifiable, reported, and publicly documented.

Why Vote YES

Redbelly Network

- Establish its first global developer onboarding infrastructure.
- Equip all regions with a replicable campus activation system.
- Strengthen Redbelly's position among universities worldwide.
- Create a scalable, high-impact pathway for contributors.
- Begin decentralized global expansion with a proven model.

This is not a regional proposal.

It is the first step in a global, DAO-wide educational framework that benefits every region equally.

☒ YES = A Global Developer Activation System for the Entire Redbelly Ecosystem

☐ NO = No standardized onboarding, no university pipeline, no global framework

Let's build the future of Redbelly Developer and Contributor expansion together.
