Overview

This proposal introduces an 8-week, research-driven educational initiative focused on improving transparency, technical clarity, and ecosystem understanding of Redbelly Network.

The output includes independent research reports and high-quality YouTube explainer videos that the DAO can reuse for onboarding, marketing, partnerships, and documentation.

The initiative runs for 8 weeks, with community checkpoints and DAO input at major milestones.

problems

Redbelly promotes strong claims (high throughput, deterministic finality, BFT performance), but there is very limited independent research verifying or

Redbelly Network

THIS MAKES IT DIFFICULT FOR:

developers,

validators,

community

institutions, and

potential partners

to fully understand Redbelly's architecture and advantages.

Unclear Tokenomics & Economic Model.

Currently the token utility, distribution, and long-term incentive structure is not widely understood.

Key questions remain researched but not clearly understood from non technical points

How does RBNT secure the network?

Is inflation planned or fixed?

What happens to validator rewards over time?

How sustainable is the current staking model?

SOLUTION

Purpose & Strategic Alignment

The project aims to:

Produce neutral, data-based research on Redbelly's technology, performance, and

ecosystem.

Create evergreen YouTube videos that simplify complex topics for non-technical

audiences.

Enhance Redbelly's transparency and credibility through open research.

Provide reusable educational assets for the community, Marketing Pod, Dev Pod, and

Partnerships Pod.

Lower the barrier for new users, developers, and potential partners.

Objectives & Strategic Fit (with Working Group alignment)

Marketing PoD

Research & Development Pod (technical clarity, comparisons)

Community Pod (education & onboarding)

Redbelly Network

8-WEEK RESEARCH & EDUCATION PLAN

Week 1 – Research Framework Setup

Define 3–4 core research areas (BFT performance, L1 comparisons, ecosystem gaps, tokenomics).

Publish research outline for DAO/community feedback.

Confirm deliverables: written reports + YouTube videos for each area.

Weeks 2–3 – Technical Research

Analyze Redbelly's architecture, consensus, performance, and security.

Compare Redbelly with 2–3 relevant L1s (neutral, data-based).

Identify strengths, weaknesses, and improvement opportunities.

Draft Research Summary Sheets.

DAO review + approval before moving on.

Weeks 4–5 – Tokenomics Research

Deep dive into RBNT token utility, security model, staking mechanics.

Explore supply model, inflation/deflation, reward sustainability.

Produce written tokenomics findings + summary.

DAO review + revision round.

Weeks 6–7 – Video Production

Deliver 3–7 videos based on completed research:

“What is Redbelly?”

“How Redbelly's BFT Works”

use cases

“Redbelly vs Other L1s (Neutral Breakdown)”

“RBNT Token Economy Explained”

Each video includes:

Final script

Animations/visuals

Voice-over

Thumbnails + SEO metadata

Week 8 – Knowledge Testing + Final Release

Redbelly Network

Final Research Report

Research Summary Sheets

Public folder (diagrams, data, documentation)

Full video playlist

DAO vote on completion + recommendations for next season.

Note:

Each weekly milestone requires DAO review and approval before progressing.

Budget & Payment Structure (USDT vs RBNT split, milestones, justification)

Total Request: \$4,000 USDT + 600,000 RBNT

Upfront Release: ~33% of USDT + Partial RBNT (community rewards only)

Remaining: Released strictly upon milestone completion and DAO verification.

I. USDT BUDGET BREAKDOWN (Total: \$4,000 USDT)

1. Research & Data Infrastructure — \$1000 USDT

Supports research tools, data sources, diagrams, and benchmarking frameworks.

Milestone-Based Payments:

\$500 Pre-Pay: Tools, diagram software,

\$250 Post-Week 4: After partial research submission

\$250 Post-Final Report: After full research approval

2. Video Production & Content Creation — \$1,800 USDT

Covers animations, editing, AI voice, thumbnails, and production software.

Milestone-Based Payments:

\$800 Pre-Pay: Production tools, voices, animation assets

\$500 Post-Week 4: After draft video delivery(continue payments to editors)

\$500 Post-Final Approval: After completed videos are verified

3. Community Engagement & Activation — \$450 USDT

Funds posters, AMAs, Spaces, design templates, and lightweight promotions.

Milestone-Based Payments:

Redbelly Network

~~\$150 Post-Final Review. After all events verified~~

4. Marketing Distribution & Outreach — \$550 USDT

Ensures research and videos reach the intended Web3 audience.

Milestone-Based Payments by partnering with 2-3 mini kols with reasonable

engagement.

\$300 Pre-Pay: Initial ad setups, boosts and upfront payment to mini kols

\$100 Post-Week 4: Mid-campaign performance check

\$150 Post-Final Verification: After full campaign review

5. Strategic Reserve — \$200 USDT

Held for unexpected animation needs, additional research tools, or urgent distribution boosts.

Milestone-Based Payments:

\$0 Pre-Pay

\$200 Post-DAO Approval Only: Used only when necessary

note the videos will be of the best quality extremely educational

Majority released post-delivery to guarantee quality and accountability.

1. Research Contributors — 200,000 RBNT

research lead - 100,000 RBNT

research analyst - 60,000 RBNT

assistants - 40,000 RBNT

Reward for technical reports, data analysis, and benchmarking.

Post-Delivery: 200,000 RBNT (after final research approval)

2. Video / Content Contributors — 150,000 RBNT

animators 80,000 RBNT

script collaborators 40,000 RBNT

graphic designers 30,000 RBNT

Compensation animators, script collaborators, graphic designers.

Post-Delivery: 150,000 RBNT (after final videos approved)

Redbelly Network

Milestones.

80,000 RBNT Pre-Pay: Initial quiz setup + early participation rewards shared among

winners

40,000 RBNT After Day 4: Mid-event distribution

30,000 RBNT Final: Based on verified participation

4. Validator & Technical Reviewer Incentives — 70,000 RBNT

Rewards experts who review research accuracy and video technical correctness.

Post-Delivery: 70,000 RBNT

(Released after verified validator/developer reviews)

5. Strategic Reserve / Bonus Pool — 30,000 RBNT

Used only for exceptional contributions or unforeseen needs.

Post-DAO Approval Only: 30,000 RBNT

Overall Budget Principles

Majority post-delivery to guarantee accountability and quality.

DAO approval required for all reserves and final payouts.

Transparent milestones across 8 weeks.

Payment Terms & Oversight:

All payments, both pre-pay and post-delivery, are subject to verification by the

designated oversight reviewer.

Transparency is ensured through documented proof of work, included in final reports

or deliverables.

Flexible and adjustable: Payments can be reallocated or modified through a DAO vote

if redistribution is necessary or to address unforeseen circumstances.

Accountability-first approach: Ensures contributors are fairly compensated for

Redbelly Network

DAO review,

promoting confidence and integrity in the initiative.

Oversight & Accountability

Oversight Roles

Community Pod Leader: Ox Godwin

Marketing Pod Leader: APE NFT

High Council: Buffy_NFTs

accountability

submit weekly reviews of all ongoing work.

submit milestone deliverables before final payouts.

be sure that progress, research quality, video production, and community engagement

meet standards

Confirm adherence to budget allocations (USDT and RBNT).

Impact & Measurement

Increased protocol understanding across the community, developers, node operators,

and external audiences.

Sharper, more accurate ecosystem messaging due to fact-based and neutral research

outputs.

Long-term educational assets (videos, reports, diagrams) that remain relevant for

months or years.

Improved onboarding funnel for developers, node operators, and new DAO members

through simplified explanations of complex concepts.

Stronger YouTube and social media presence for RedbellyNetwork supported by

high-quality educational content.

Redbelly Network

builders, institutions, and partners.

Clearer differentiation against competing L1s, helping Redbelly position itself as a

high-performance BFT chain.

Improved decision-making within the DAO, as members gain access to accurate research

summaries and validated information.

Reusable content for the Marketing Pod, Dev Pod, and Partnerships Pod, reducing

duplicate effort across the ecosystem.

KPIs / Measurable Success Criteria:

Research Quality: At least 80% of reports approved without revisions.

Educational Content: Produce 3-8 high-quality, reusable videos and reports.

Community Education: At least 70% of participants answer follow-up quizzes correctly.

Developer & Partner Onboarding: Onboard new developers and engage 2 new strategic partners.

Social Media Engagement: Each video and x threads gets at least 5,000 impressions,

50% average watch-through, and increased likes, comments, and shares.

Protocol Transparency: Positive feedback from at least 2 external partners.

Ecosystem Health: Run at least 3 new collaborations or events.

Midpoint Review (Week 4):

Check progress on research reports, draft videos, and early community engagement.

Make adjustments if KPIs are not being met.

Final Review (Week 8):

Review all research, videos, and community engagement results.

Confirm achievement of all KPI targets.

Provide lessons learned and final report to DAO.

Redbelly Network

OVERVIEW VOTES 25

Risk: Low community engagement

→ Solution: Small RBNT tasks and polls throughout the process.

Risk: Delayed production

→ Solution: Weekly milestones with transparent tracking.

Co-Funding & Leverage

External Support & Resources:

Audience & Platform Leverage: The proposer already has 7,000 YouTube subscribers and

2,000+ crypto-native X followers, which will be used to distribute and amplify

educational content without additional funding.

Partnerships for Cost Efficiency: Collaborations with external video editors reduce

production costs, making DAO funds more efficient.

Existing Equipment: High-quality phones and cameras are available for shooting

videos, reducing the need for additional equipment purchases.

Research Expertise: The proposer has in-depth knowledge in blockchain and ecosystem

research, which minimizes the need for too many external researchers to preserve

funding.

DAO Funding Role:

DAO funding will primarily cover software, milestone incentives, community rewards,

and strategic reserves.

The project is not funded entirely from scratch, and existing resources significantly leverage DAO funds for higher ROI.

Contribution Equity

Fair Distribution of Payouts:

The project has 4 contributors, each assigned distinct roles:

Redbelly Network

Community & Engagement Manager

Technical Reviewer / Validators

Payouts are distributed fairly across contributors based on work scope, responsibilities, and milestone deliverables.

Community Involvement

Overview:

The proposer has an active presence in the crypto/Web3 community, with 7,000 YouTube subscribers and 2,000 X followers. This provides a strong platform to engage the Redbelly ecosystem and ensure wide dissemination of research and educational content.
