

The chart displays the daily number of COVID-19 cases in the Netherlands from December 17 to December 20. The green line represents the actual number of cases, which shows a steady increase from approximately 1,000 on Dec 17 to about 1,500 on Dec 20. The red line represents the predicted number of cases, which follows the actual data until around Dec 19, where it begins to rise sharply, reaching approximately 2,500 by Dec 20.

Date	Actual Cases (Green)	Predicted Cases (Red)
Dec 17	~1,000	~1,000
Dec 18	~1,100	~1,100
Dec 19	~1,200	~1,200
Dec 20	~1,500	~2,500
