Redbelly Developer Docs - Production Ready Onboarding System

Submitted by: @akhilmanga

Working Group: Build/Development

Date: 18/12/2025

Funding Request: \$5,000 equivalent in RBNT

1. Proposal Summary

This proposal requests DAO approval to integrate a comprehensive, production-ready developer docs that transforms Redbelly fragmented technical resources into a onboarding system with working code templates and institutional-grade compliance guidance. The deliverable - already completed - includes four original RWA use case implementations and the industry's first "Build Compliant RWAs in 6 Steps" playbook, creating a on-ramp for developers, legal teams, and financial institutions.

2. Problem & Rationale

Problem

Current Redbelly documentation (Vine portal) lacks structure for builders with:

No beginner-to-advanced learning path

Redbelly Network

Finance....)

Institutional barriers: legal/technical teams cannot collaborate effectively

Rationale

This developer docs directly addresses:

The #1 friction point for ecosystem growth: developer onboarding

“Build Compliant RWA in 6 Steps” guide - code + tests

Beginner to institutional readability: a lawyer, bank engineer, or solo dev can all find their path

The missing bridge between Redbelly technical architecture and business applications

3. Objectives & Strategic Fit

Objectives

Reduce developer onboarding time

Enable legal/finance teams to understand technical implementations through plain-language explanations

Create reference implementations for high-value RWA verticals

Establish Redbelly as the most developer-friendly RWA blockchain

Strategic Fit

Aligns with:

Build Working Group: Tooling, infrastructure, and developer experience

Partnerships Working Group: Institutional adoption path

4. Scope of Work & Timeline

Scope

Complete documentation architecture restructure (31 pages)

Four production-ready Ricardian contract templates with:

Eligibility hooks for jurisdictional compliance

Pay Connect integration mocks

Ricardian hash generation utilities

Testing frameworks

"Build Compliant RWAs in 6 Steps" playbook with executable code

Multi-audience pathways (developer, legal, business) for each module

Redbelly Network

Delivery: Full integration within 2 days of approval

Maintenance: 12 months of updates (quarterly updates)

5. Key Deliverables & KPIs

Deliverables

GitHub repository with all code templates

Complete GitBook docs (<https://redbelly-network.gitbook.io/redbelly-network-docs/>)

Direct integration path into Vine developer portal OR Gitbook docs can be added directly to the Redbelly website, since most users are familiar with Gitbook docs(My suggestion)

KPIs

50% reduction in developer support queries

External projects/Developers implementing playbook patterns

90% positive feedback on documentation clarity (community surveys)

6. Budget Breakdown

Total Request: \$5,000 equivalent in RBNT

Technical writing + Smart Contract development = \$5,000 (Market rate for Web3 technical writing + development: above \$400/day)

Value Proposition

100% of work already completed before funding request

Full content ownership transferred to DAO upon payment

Estimated 100+ hours of developer time saved monthly across redbelly ecosystem

Creates foundation for \$100K+ in future grant applications

OVERVIEW VOTES 18 DISCUSSION ↗

100% on delivery upon \$5000 worth of RBNT grant reward.

Payment in RBNT

8. Oversight & Accountability

Primary Contact: @akhilmanga

Redbelly Network

9. Integration Plan

Primary home: Content migrated to

<https://vine.redbelly.network/developer> OR Directly embed the GitBook docs(<https://redbelly-network.gitbook.io/redbelly-network-docs/>) into the website - most users are familiar with gitbook

Grants program: Playbooks featured as reference implementations

Community: Zealy quests for creating tutorials based on the documentation

10. Final Note

I'm not asking for a grant to write docs.

I'm offering to build the missing onboarding layer into existed docs.

I believe in Redbelly mission and I'm requesting fair compensation for work already completed to accelerate redbelly growth

Docs: <https://redbelly-network.gitbook.io/redbelly-network-docs/>
