The screenshot shows a Discord message from the Redbelly DAO Bot. The message content is a dashboard for the Redbelly DAO. At the top, it says "Redbelly DAO" with a bell icon and "2 open · 2 awaiting your vote". Below this is a message: "Stay active. Link your wallet to track participation." There are three statistics: "Proposals 26", "Followers 59", and "Total Votes 421". Under "Your Wallet", it shows a green checkmark and "0x9D7A...4332 - linked". At the bottom of the dashboard, it says "Redbelly DAO · rbnt.eth · Today at 12:19 PM". Below the dashboard are several buttons: "Active · 2 open", "Past", "Leaderboard", "Tasks", "My Profile", "Wallet", and "Submit Proposal". At the very bottom, it says "Only you can see this · Dismiss message".

Name: *(Berlin)*

****Summary****

This proposal requests funding of **\$350 USDT per month** for the continued development, hosting, maintenance, and operation of the official Redbelly

Redbelly Network

The bot is designed to become a central hub for DAO members by simplifying governance, improving communication, and supporting contributor coordination. It also provides a foundation for future DAO features such as task management, contributor notifications, and community engagement.

**** Problem & Rationale****

As the Redbelly DAO grows, community members use several different platforms to access governance updates, participate in discussions, and coordinate work. This can make it difficult to stay informed and engaged.

A dedicated Discord bot provides a single place where members can access governance information, receive important notifications, and, in the future, manage contributor tasks without leaving Discord.

Combining bot development with community management ensures that both the technical platform and the community continue to grow together.

Objectives

The objectives of this proposal are to:

- Improve communication within the DAO.
- Increase participation in governance.
- Provide automated notifications for DAO activities.
- Build a task management system for contributors.
- Support onboarding and engagement of community members.
- Create a more active and organized Discord community.

**** Current Features****

The bot already includes:

Redbelly Network

- Active and past proposal browsing
- Proposal details and voting information
- Wallet linking
- Member profiles
- Participation leaderboard
- Automatic notifications for new proposals
- Voting reminder notifications

**** Planned Features****

During this funding period, development will focus on expanding the bot with:

Task Management

- Members can view available DAO tasks.
- Members can accept tasks.
- Members can submit completed work.
- Administrators can approve or reject submitted tasks.
- Automatic notifications when new tasks become available.
- Status updates for accepted and completed tasks.

**** Community Management****

- Discord moderation and support.
- New member onboarding.
- Community announcements.
- Community games and engagement events.
- General server management.
- Regular improvements based on community feedback.

Deliverables

Redbelly Network

-
- Ongoing maintenance and bug fixes.
 - New feature development.
 - Discord community management.
 - Community engagement activities.
 - Technical support.
 - Performance monitoring.
 - Regular updates and improvements.

**** Budget****

Service	Monthly Cost
Bot Hosting & Infrastructure	\$100 USDT
Development & Maintenance	\$100 USDT
Discord Community Management	\$100 USDT
Community Games & Events	\$50 USDT

Total Requested

\$350 USDT per month

Payments are requested monthly based on continued delivery of services.

Success Metrics

Success will be measured through:

- Increased community participation.

OVERVIEW **VOTES** 20

-
- Number of wallet-linked members.
 - Task participation once implemented.

Redbelly Network

-
- Positive feedback from DAO members.

Oversight & Accountability

Monthly updates will be provided to the DAO including:

- Features delivered.
- Bot uptime.
- Community management activities.
- Planned improvements for the following month.

**** Risk & Mitigation****

Potential risks include Discord API changes, hosting issues, or feature requests beyond the current scope. These will be addressed through ongoing maintenance, monitoring, backups, and regular updates.

**** Community Involvement****

Community feedback will guide future improvements. Members will be encouraged to suggest new features, report issues, and participate in testing to ensure the bot continues to meet the DAO's needs.

**** Decision Requested****

Approve funding of \$350 USDT per month for the development, hosting, maintenance, and ongoing management of the Redbelly DAO Discord Bot and Discord community services.

This proposal aims to provide the DAO with a reliable platform for governance, communication, contributor coordination, and community engagement, while laying the groundwork for future features such as integrated task management and automated contributor workflows.
