## DAO Proposal: Increase Governance Accessibility and Protect Contributor Privacy

### Proposal Title

**Remove Voting Whitelist Requirement and Remove Geographic Restrictions for General DAO Members**

### Submitted By

@rainbowmagician1

0xA4811219b12CE85B377Cd8197b929e98d1C3CdE1

### Summary

This proposal seeks to improve accessibility and participation within the Redbelly Community DAO by:

Removing the whitelist requirement for participation in DAO voting.

Removing geographic restrictions for General DAO Members.

Maintaining all existing geographic limitations for High Council Members and General DAO Leadership.

The proposal aims to lower barriers to participation, better protect contributor privacy, and further support the DAO's long-term goal of progressive decentralisation.

## Redbelly Network

steward growth, adoption, and decentralisation of the community while progressively decentralising governance as the contributor base matures. It also identifies Progressive Decentralisation and Fair Access, with Structured Onboarding as founding principles.

The current governance framework also establishes geographic limitations for leadership positions to ensure decentralisation and geographic diversity.

This proposal does not seek to modify those leadership protections.

Instead, it proposes that these geographic limitations should apply only to High Council Members and General DAO Leadership, allowing General DAO Members to participate regardless of country of residence.

Additionally, removing the voting whitelist would reduce onboarding friction and better respect contributor privacy by avoiding unnecessary disclosure of personal information for members who simply wish to participate in governance.

This proposal is intended to:

- Lower barriers to governance participation.

- Encourage wider community engagement.

- Improve contributor privacy.

- Preserve decentralisation safeguards where they matter most—leadership positions.

Note: The uploaded governance documents do not explicitly document a voting whitelist requirement. If the whitelist exists as an operational or Snapshot configuration rather than a constitutional rule, that implementation should be referenced during governance discussion.

### Objectives & Strategic Fit

This proposal supports the DAO by:

- Increasing governance participation.

- Reducing onboarding friction.

- Improving contributor privacy.

- Encouraging greater international participation.

- Supporting progressive decentralisation.

- Maintaining existing geographic protections for High Council and General DAO Leadership.

## Redbelly Network

---

Remove the whitelist requirement for participation in DAO voting (where technically applicable).

### Milestone 2

Amend governance documentation so that geographic restrictions apply only to:

High Council Members

General DAO Leadership

General DAO Members would no longer be subject to regional eligibility restrictions.

### Milestone 3

Publish updated governance documentation and communicate the changes through official DAO channels.

## Budget & Payment Structure

USDT Requested: 0

RBNT Requested: 0

No treasury funding is requested.

## ROI & Impact

Success will be measured by:

Increased number of DAO participants.

Higher Snapshot voter participation.

Greater geographic diversity among contributors.

Reduced onboarding friction for new members.

Improved contributor privacy by removing unnecessary whitelist requirements.

## Oversight & Accountability

Implementation will be overseen by the High Council.

Any documentation updates should be published publicly following the existing governance process: publication of revised constitution, publication of updated handbook, confirmation when snapshot settings (if any) have been updated.

## Redbelly Network

---

### Mitigation

Increased number of voting participants

Existing proposal review and voting processes remain unchanged.

Confusion regarding leadership eligibility

Documentation will clearly state that geographic restrictions remain in place for High Council Members and General DAO Leadership.

Governance documentation inconsistencies

Update all affected governance documents simultaneously.

### Co-Funding & Leverage

**OVERVIEW** VOTES 13

---

### Team & Contributors

Community governance proposal.

### Community Involvement

Community discussion on Discord before Snapshot submission.

Feedback incorporated prior to voting.

### Compliance & Ethical Standards

This proposal:

Does not request treasury funding.

Does not modify treasury management.

Does not change compensation models.

Does not alter conflict-of-interest provisions.

Preserves existing decentralisation safeguards for leadership positions.

Supports broader community participation while respecting the DAO's governance principles.

### Supporting Documents

Redbelly Community DAO Constitution v1.3

Community DAO Handbook

### Decision Requested

Approve the following governance changes:

## Redbelly Network

---

**Remove geographic restrictions for General DAO members.**

**Retain all existing geographic limitations for High Council Members and General DAO Leadership.**

**Update the Constitution and related governance documentation to reflect these changes.**

**Publish the revised governance documentation following the existing amendment process.**
